

Serpent Mind

From Satanism Wiki

The Serpent is an entity which has it's own mind, and goals. All a **Risen** does must be in the best interest of the Serpent, otherwise they **will** go insane. All power of life comes from the Serpent, and all life has a variation of the Serpent. All Serpents of a species share a common goal, in the case of the Satanic Serpent it is to learn more, and advance to a level which is impossible today but possible tomorrow. The Serpent constantly evolves, with every breath we take, there is no beginning or end to this evolution. Thinking with the Serpent is the most useful thing a person can do, unfortunately this is only possible from an **Awakened** stage.

Thinking in an Awakened Stage

While it is possible to think with the Serpent at this stage it is extremely hard to do.

1. Go into a trance, and focus on your Serpent.
2. Feel the Serpent fuse it's thoughts with your thoughts.

Thinking in a Risen Stage

While the procedure is the same as in the **Awakened** stage, it becomes extraordinarily simpler to perform correctly, in fact a lot of the time you will not even need to be in a trance. Especially after the Rising, the Serpent will naturally overpower your thoughts.

Note: you will likely not understand the Serpent's thoughts for a while because it thinks on a higher and much more elevated level than we are used to thinking.
